Martin by Despot Carpets represent the synergy between technology, manufacturing and quality with creative ideas, forms and passion.

Martin by Despot Carpets are a reflection of our time and in our context they connect east and west, explore new possibilities and methods based on our own reality and search for our own expression. Carpets are woven by hand tufting, made with 100% pure wool from New Zealand, in weights from 3600 gr/m² to 4500 gr/m² in a wide spectrum of patterns and designs. The proprietary color scheme contains few hundred hues. The colors and dimensions are suggested but can be custom designed for each customer. The unique character of Martin by Despot Carpets is brought about by the playful variations of weave thicknesses - each carpet can have up to 4 different heights from 40 mm, 14 mm, 10 mm to 7 mm) - so that the rich multicolored effect is achieved even in monochrome products.

Our brand is a new kind of collaboration between the manufacturer and the designer, in a common search of best ways to translate ideas into reality with a highest standards. The collaboration between Martin Ltd. and the designer Sjetlana Despot started in 2000 and combines contemporary clarity of ideas and traditional fabrication by hand. Our original concepts unite natural materials and high quality manufacturing with true life emotions. With our innovative technics of weaving, cutting, shearing and unusual combinations of these techniques makes each carpet a surprising centerpiece in each and every space.
